

Adjustable Steel Props

Our Adjustable Steel Props are designed and manufactured to fully satisfy the requirements of the Australian Standard AS3610.

They provide excellent temporary support and are economical, easy and quick to erect.

Inner and outer cylindrical steel tubes welded to steel square plates (150mm x 150mm);

The steel used has high yield strength

The Benefits of Adjustable props are their simple and innovative design;

- Its light weight allows Adjustable Props to be handled by a single person;
- Strong, Durable and Versatile with highly adjustable height
